02 PrnVideoTitle	PIC BBBB(40).
02 PrnSupplierCode	PIC BBBB99.

In this program we show how to read an Indexed file directly on either the primary key or the secondary key. These condition names tell us upon what key the user wants use to read the file.

PROCEDURE DIVISION.

KEY IS VideoCode

First we find out
which key the user
wants to use to read
the file.

KEY IS VideoTitle

RecordFound is a
condition name monitoring
the File Status.
If RecordFound is true
then the read succeeded
and it is ok to display the
record.
